## Premium Drain Auger

Increase drain auger sales by ordering them with these attractive tamper-resistant plastic display bags. Complete directions on the back in English, French and Spanish. These models have professional-type sliding crank handles with smoothly working hand grips. This feature gives the augers a more attractive, high quality appearance.

The handle is formed from heavy-wall tubing and the thumb screw is 1/2" (13 mm) long x 1/4" (6 mm) for solid gripping without thread stripping. In addition, the handle has a good offset for greater turning leverage.

Made of high tensile bright wire. 1/4" (6 mm) augers have basin plug head for easy threading through strainer crossbars. 3/8" (10 mm) and 1/2" (13 mm) augers have large bulb-shaped corkscrew boring head.

## Drain Flusher

Opens clogged drains with water pressure. Just attach to garden hose and slide Drain Flusher into drain. Water expands Flusher to size of pipe. Then water pressure pushes stoppage down the line. Equipped with backflow preventer on the inlet side.

## Flood-Guard™

Prevents basement flooding. Operates like a check valve to seal off water back-up caused by overloaded sewers. Water flows normally through the drain until the sewer begins to back up. Then the Flood-Guard float rises to seal off the drain opening until the water recedes. Installed in minutes. For extreme, extended pressure (for instance, where homemade seals have popped out of line), we recommend our standpipe models.
